Summary

Enthusiastic and dedicated **Computer Engineering** student with a strong foundation in **game development**, **web development** and **desktop application development**. Proficient in programming languages, 2D/3D game design, and modern web technologies, with hands-on experience in **Godot**, **ASP.NET**, and desktop frameworks such as **WPF**, **Avalonia**, and **WinUI**. Seeking opportunities to apply creative problem-solving and technical skills across multiple platforms, aiming to contribute to engaging digital experiences and dynamic applications within a forward-thinking organization.

Experience

Tıkır Oyun Arşivi

Antalya, Türkiye

Nisan 2025 - Günümüz

Commercial desktop app for a company

We are currently developing an ecosystem for internet cafés called **Tıkır Oyun Arşivi**. I am responsible for the **desktop application development**, while my colleague is working on the **Python-based API**.
